

Abstract of the Disclosure

5 An interactive television program guide  
system is provided in which the program guide may  
provide the user with a selectable list of combination  
categories. Combination categories are composed of  
multiple simple categories such as sports, news,  
comedy, movies, children, etc. Program listings are  
supplied to the program guide. At least some of the  
program listings are associated with combination  
10 categories. A combination category build process may  
be used to assign combination categories to program  
listings. The user is able to use the selectable  
categories list to quickly identify programming of  
interest.
